50X1-HUM

1. During the early hours of 25 April 1950, 22 heavy armored vehicles were unloaded from a Soviet transport train near Karczag, Hungary. These are described as very broad and flat, with rail equipment on the roof and an exhaust for Diesel motors, and are assumed to be "Katyusha" rocket-launchers. They were driven away in the direction of Fegyvernek (O 68).

2. At the same time some heavy crates, six feet long by one foot wide (third dimension not given), were unloaded.\* The crates were carried by four men each to trucks, in which they were then driven toward Fegyvernek.

\* Comment: These crates were similar to a number of crates which were unloaded, along with 50-60 heavy motor trucks, on 20 April from a train arriving from the direction of Debrecen. 50X1-HUM
